55 / 100 Speed

 Should Fix:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- http://www.vip-transfer.cl/css/estilo_responsive.min.css (expiration not specified)
- <http://www.vip-transfer.cl/css/iview.css> (expiration not specified)
- <http://www.vip-transfer.cl/css/skin4/style.css> (expiration not specified)
- <http://www.vip-transfer.cl/imagenes/bg1.jpg> (expiration not specified)
- <http://www.vip-transfer.cl/imagenes/bg2.jpg> (expiration not specified)
- <http://www.vip-transfer.cl/imagenes/slide01.jpg> (expiration not specified)

Mobile

- <http://www.vip-transfer.cl/imagenes/slide02.jpg> (expiration not specified)
- <http://www.vip-transfer.cl/imagenes/slide03.jpg> (expiration not specified)
- <http://www.vip-transfer.cl/js/iview.min.js> (expiration not specified)
- <http://www.vip-transfer.cl/js/jquery-1.7.2.min.js> (expiration not specified)
- <http://www.vip-transfer.cl/js/jquery.easing.js> (expiration not specified)
- <http://www.vip-transfer.cl/js/parallax.min.js> (expiration not specified)
- <http://www.vip-transfer.cl/js/raphael-min.js> (expiration not specified)
- http://connect.facebook.net/es_LA/sdk.js (20 minutes)
- <http://platform.twitter.com/widgets.js> (30 minutes)
- <https://apis.google.com/js/plusone.js> (30 minutes)

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 5 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://www.vip-transfer.cl/js/jquery-1.7.2.min.js>
- <http://www.vip-transfer.cl/js/raphael-min.js>
- <http://www.vip-transfer.cl/js/jquery.easing.js>
- <http://www.vip-transfer.cl/js/iview.min.js>
- <http://www.vip-transfer.cl/js/parallax.min.js>

[Optimize CSS Delivery](#) of the following:

Mobile

- <http://www.vip-transfer.cl/css/iview.css>
- <http://www.vip-transfer.cl/css/skin4/style.css>
- http://www.vip-transfer.cl/css/estilo_responsive.min.css

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 424.8KiB (40% reduction).

- Compressing <http://www.vip-transfer.cl/imagenes/slide02.jpg> could save 234.8KiB (48% reduction).
- Compressing <http://www.vip-transfer.cl/imagenes/slide03.jpg> could save 146.5KiB (44% reduction).
- Compressing <http://www.vip-transfer.cl/imagenes/bg2.jpg> could save 38.9KiB (17% reduction).
- Compressing <http://www.vip-transfer.cl/imagenes/bg1.jpg> could save 4.6KiB (19% reduction).

Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 2.7KiB (38% reduction).

- Compressing <http://www.vip-transfer.cl/fonts/sns.ttf?mlm4km> could save 2.7KiB (38% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 18% of the final above-the-fold content could be rendered with the full HTML response snapshot:8.

Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

94 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `contacto@vip-transfer.cl` is close to 1 other tap targets final.
- The tap target `+569 7594 6711` and 2 others are close to other tap targets final.
- The tap target `+569 7594 6711` and 1 others are close to other tap targets final.
- The tap target `Inicio` and 7 others are close to other tap targets.
- The tap target `+569 7594 6711` and 1 others are close to other tap targets.
